Work Experience

- **Software Engineering Intern** **Bethesda, MD**
  Leidos *May 2021 – Aug. 2021*
  Worked on the All-World Environment Simulation (AWESIM) project, a high-fidelity physics-based simulation of the generation and propagation of acoustic signals in the ocean for sonar trainers in the U.S. Navy. Developed, debugged, and tested code in C++, Python, and Typescript. Used a Jira Kanban Board, the Conan C++ package manager, React.js, and RESTful web services.
- **Teaching Assistant for CS 3330** **Charlottesville, VA**
  University of Virginia *Feb. 2021 – Present*
  Assisting students with understanding computer architecture concepts and the x86 assembly language. Hosting weekly office hours, cohosting lab sections, and answering questions on Piazza.
- **Undergraduate Researcher** **Charlottesville, VA**
  University of Virginia *Jun. 2020 – Sep. 2020*
  Analyzed different combinations of data poisoning and PGDAttack in adversarial training of a linear SVM to investigate if the two adversarial methods amplify or hinder each other.

Skills

- **Programming Languages:** Python, Java, C++, C, JavaScript, HTML, CSS, SQL, C#, Bash, MATLAB
- **Libraries:** React.js, NumPy, Matplotlib, Scikit Learn, TensorFlow, Keras, PyTorch, OpenCV, Pandas
- **Tools:** Visual Studio Code, Eclipse, Vim, JUnit Testing, GitHub, VirtualBox, Conan, Docker, Kubernetes, Jenkins, Jira, Django, Heroku, Jupyter Notebook, Wireshark
- **Operating Systems:** Linux, Windows

Education

- **University of Virginia** **Charlottesville, VA**
  B.S. Computer Science, GPA: 3.99/4.00 *Aug. 2019 – May. 2023*
- **Thomas Jefferson High School for Science and Technology** **Alexandria, VA**
  Advanced Studies Diploma, GPA: 4.53 *Sep. 2015 – Jun. 2019*
- **Relevant Coursework:** Operating Systems, Algorithms, Data Structures, Databases, Computer Networks, Computer Architecture, Machine Learning, Artificial Intelligence, Computer Vision, Discrete Math, Linear Algebra, Probability, Statistics

Projects

- **Chess Game Tracking via Computer Vision & Deep Learning** **Alexandria, VA**
  Thomas Jefferson High School for Science and Technology *Aug. 2018 – May 2019*
  Developed project on chess game tracking through computer vision and deep learning using a custom dataset and a Convolutional Neural Network. Used the Keras, TensorFlow, and OpenCV Python libraries.
